Boston
Feb 21st 95

Charles A Post - Esqr
Chairman Sub. Com on Astronomy
N.Y. Academy of Sciences

Dear Sir -

I beg to apologize for accidentally neglecting to answer your letter before - As it does not name a date I am uncertain whether it be not now too late to reply - In this uncertainty, I remain

Yours very truly
Percival Lowell

DSI

v_1 = actual velocity of Jupiter.

Relative orbit of comet = hyperbola round Jupiter.

The effect of Jupiter is to swing the asymptote round through any angle. As the figure shows this may be such as to make v' of hyperbolic character, whereas in this case it can never impart a retrograde motion.

Yours very truly,

Percival Lowell.

FLAGSTAFF, A.T. _____ 190

53 State Street, Boston.

Dec. 17, 1907.

Mr. William H. Knight, Chairman,

Southern California Academy of Scineces.

Dear Sir:-

I have your letter of Dec. 5th asking for permission to use the illustration of Mars on page 255 of the current McClure's in your semi-annual Bulletin of the Proceedings of your Academy and I beg to say that I am very glad to send you the original of the same for your reproduction which I enclose in this and will ask you to kindly return it when you have finished with it.

Yours very truly,

Percival Lowell.

P.S. If you do not receive the Bulletin referred to this Obs- write to see what they can send you.

P. L.
